Forecast for Monday 24 Jun 2024

Weather: Some patches of lower cloud overnight, thickest in the west where there could perhaps be the odd spot of light rain. In general though staying dry and cloud lifting through the morning to give a fine and bright day with light winds, warm temperatures and plenty of sunshine.

Chance of cloud-free hill tops above 800m: 70% overnight and into the early morning, improving to 95% by the early afternoon.

Low Cloud and visibility: Patches of cloud down to around 400-500m possible overnight and into the early morning, particularly for western parts of the park, but these tending to lift and break into the early afternoon to give fair weather clouds well above summits. Visibility locally poor at height overnight within cloud but generally good or very good through the day.

Freezing Level*	3300m	3200m	3200m	3200m	3200m	3300m	3400m	3400m	3500m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV index and with light wind and warm temperatures adequate water and sun protection is essential. Pollen levels are also very high.

Forecast for Tuesday 25 Jun 2024

Weather: Patchy low cloud is possible on Tuesday both to start and end the day, but generally another fine, largely dry and warm day likely with some sunny spells possible during the afternoon.

Maximum wind: Generally westerly 10 mph gusting 15mph.

Chance of cloud-free hill tops above 800m: 60% early and later in the day but 90% during the afternoon.

Low Cloud and visibility: Patches of cloud down to around 300-400m possible early and late in the day, particularly for western parts of the park. Fair weather clouds well above summits dominating during the afternoon. Visibility locally poor at height within cloud but generally good or very good through the day.

Temperature: **Valleys:** Plus 14 Celsius, rising to Plus 20 Celsius.
At 800m: Plus 11 Celsius, rising to Plus 14 Celsius.
Freezing level: Above summits.
